

# Andrii Ribert

## Profile

I am an experienced Senior Shopify Developer with over 10 years of hands-on expertise building, customizing, and scaling Shopify stores for brands across retail, beauty, wellness, and tech sectors. My focus is on delivering high-performance, conversion-optimized eCommerce experiences that align design, functionality, and growth strategy.

I have led full theme builds and headless Shopify integrations using Shopify Plus, Liquid, JavaScript, and GraphQL, along with complex app integrations such as Recharge, Klaviyo, and Order Desk. I specialize in creating custom sections, metafields, dynamic collections, and reusable components that give clients complete control over content and merchandising while maintaining best-in-class performance and SEO.

Beyond technical skills, I bring strong communication, project management, and collaborative abilities, working closely with designers, marketers, and stakeholders to launch on time and exceed expectations. Whether maintaining legacy code or modernizing for Shopify 2.0, I take pride in writing clean, maintainable code and delivering pixel-perfect user experiences.
